

REPUBLIKA E SHQIPËRISË
UNIVERSITETI I SPORTEVE TË TIRANËS
SENATI AKADEMIK

Nr. 784 Prot.

Tiranë, më 14.04 2026

VENDIM

Nr. 55 dt. 13.04 2026

**“PËR
SHFUQIZIMIN E VENDIMIT NR. 45 DATË 03.04.2026 TË SENATIT AKADEMIK DHE
MIRATIMIN E MARRËVESHJES PËRFUNDIMTARE TË PROGRAMIT TË
PËRBASHKËT MASTER I SHKENCAVE NË “SHKENCA REHABILITUESE TË
PROFESIONEVE TË SHËNDETIT”, ME DIPLOMË TË DYFISHTË, MIDIS
UNIVERSITETIT TË SPORTEVE TË TIRANËS, FAKULTETIT TË SHKENCAVE TË
REHABILITIMIT DHE UNIVERSITETIT “MAGNA GRAECIA” TË KATANXAROS
NË ITALI”**

Mbështetur në nenin 3, 38 dhe 80 të Ligjit nr. 80/2015 “Për Arsimin e Lartë dhe Kërkimin Shkencor në IAL në Republikën e Shqipërisë”, Vendimin nr. 57 datë 29.01.2020 “Për dhënien e statusit të veçantë Universitetit të Sporteve të Tiranës”, Udhëzimin nr. 1, datë 14.1.2020 “Për dokumentacionin dhe procedurat për hapjen, riorganizimin dhe mbylljen e institucionit të arsimit të lartë, degëve të tyre, njërive kryesore dhe programeve të studimit, si dhe për ndarjen ose bashkimin e institucionit të arsimit të lartë”, i ndryshuar, në nenin 7, 20, 73 të Statutit të UST-së, në nenin 7, 54 dhe 55 të Rregullores së UST-së, Vendimit nr.58, datë 13.04.2026 të Rektoratit, Senati me vendim qarkullues

VENDOSI:

1. Shfuqizimin e Vendimit nr.45 datë 03.04.2026 të Senatit (bashkëlidhur).
2. Miratimin e marrëveshjes përfundimtare të programit të përbashkët Master i Shkencave në “Shkenca Rehabilituese të Profesioneve të Shëndetit” me Universitetin “Magna Graecia” të Katanaxaros në Itali, (bashkëlidhur).
3. Nisjen e procedurave për aplikim për hapjen e programit të përbashkët Master i Shkencave në “Shkenca Rehabilituese të Profesioneve të Shëndetit”, me diplomë të dyfishtë midis

Universitetit të Sporteve të Tiranës, Fakulteti i Shkencave të Rehabilitimit dhe Universitetit “Magna Graecia” të Katanxaros, Itali”.

4. Miratimin e pagesave për profesoratin e ftuar për mbulimin e shpenzimeve të transportit, fjetjes, dietës ditore si dhe pagesën për orë mësimdhënieje, sipas akteve rregullatore dhe marrëveshjes së miratuar.
5. Ky Vendim i përcillet Bordit të Administrimit.
6. Ky Vendim i përcillet për njohje dhe zbatim FSHR-së, si dhe Drejtorisë Së Zhvillimit të Programeve dhe Digjitalizimit të Shërbimeve Akademiko-Shkencore për publikim.
7. Ky Vendim hyn në fuqi menjëherë.

KRYETARI I SENATIT

Prof. Dr. Agron KASAP

AGREEMENT FOR INTERNATIONAL COOPERATION – Master degree in Rehabilitative Sciences of Health Professions

between

UNIVERSITY "MAGNA GRAECIA" OF CATANZARO (ITALY)

and

SPORTS UNIVERSITY OF TIRANA (ALBANIA)

for a Joint Training Program leading to a Master Degree in "Rehabilitative Sciences of Health Professions"

Article 1 — Subject of the Agreement

The objective of this Agreement is to establish a Joint Training Program between the University "Magna Graecia" of Catanzaro (Italy) and the Sports University of Tirana (Albania) leading to a Master Degree in "Rehabilitative Sciences of Health Professions".

The program aims to enhance academic collaboration and provide students with an international educational experience through a shared curriculum and student mobility.

Article 2 — Structure of the Program

The Master training program will be organized according to the following scheme:

- All Students will attend the first year and the first six months of the second year at the Sports University of Tirana and the second semester of the second academic year and take the final examination at the University of Catanzaro.
- The teaching language will be Italian.
- The academic plan is enclosed (Annex 1).
- The internship of students will be entirely done at University of Catanzaro (30 ECTS)
- In particular all clinical training activities are carried out in University Hospitals of Catanzaro (AOU "R. Dulbecco") and in other public hospitals that provide comprehensive healthcare services, advanced diagnostic facilities, and multidisciplinary clinical environments (Annex 2).

Rehabilitation Sciences	1	1	Pharmacology	1 ECTS	Prof.ssa Francesca Bosco
Rehabilitation Sciences	1	1	Physical and Rehabilitative Medicine	3 ECTS	Prof. Andrea Demeco
Rehabilitation Sciences	1	2	Neurology	2 ECTS	Prof.ssa Gennarina Arabia
Rehabilitation Sciences	2	1	Nursing Sciences and Neuro-Psychiatric and Rehabilitative Techniques (Applied to Rehab)	3 ECTS	Prof. Angelo Pascarella
Rehabilitation Sciences	2	1	Nursing Sciences and Neuro-Psychiatric and Rehabilitative Techniques (Motor Rehab)	3 ECTS	Prof.ssa Aisel Oseku
Rehabilitation Sciences	2	1	Physical and Rehabilitative Medicine	2 ECTS	Prof. ssa Klejda Tani
Rehabilitation Sciences	2	1	Musculoskeletal Diseases	2 ECTS	Prof. Antonio Ammendolia
Rehabilitation Sciences	2	2	Otorhinolaryngology	1 ECTS	Prof. Giuseppe Chiarella

The costs related to board, lodging, travel shall be covered by the University of Catanzaro in compliance with the current regulatory provisions.

The degree certificates will mention the study results and will be accompanied by a Diploma Supplement, with the didactic program, according to the European Commission and the Council of Europe.

The final exam consists in a dissertation co-directed by professors from both partner Universities. In addition, students are required to undertake a practical examination.

Each student can ask a professor and propose a thesis topic that must be accepted by both universities. The final discussion will be held at University of Catanzaro. The thesis must be written in Italian.

- teaching and scientific laboratories relevant to the Degree Program;
- IT infrastructure and internet connectivity adequate to support academic activities;
- university libraries and electronic databases;
- study areas and student facilities;
- teaching aids and educational materials.

All facilities are specified in Annex 3 to this Agreement.

The Parties agree that such facilities and resources shall meet the academic and professional standards required for higher education programs in the health professions and shall be accessible to mobility students under the same conditions granted to regularly enrolled students of the host institution.

Date and Place: _____

The physiological data collected allow for the monitoring of training load, the individualized planning of exercise programs, and the protection of the health status of athletes and physically active individuals.

3. Posture and Movement Analysis Laboratory

The Posture and Movement Analysis Laboratory specializes in postural assessment and the analysis of human movement under both static and dynamic conditions. The laboratory uses the Diers 4D system, an advanced technology for three-dimensional and temporal posture analysis.

Through this system, spinal deviations can be identified with high precision, analyzing them in relation to the support plane and load distribution. The instrumentation enables the identification of asymmetries and postural dysfunctions, providing scientific support for postural correction interventions, functional rehabilitation, and movement optimization.

4. Health Diagnostics and Optimization Laboratory

The Health Diagnostics and Optimization Laboratory focuses on the integrated assessment of an individual's health status and functional capacity through advanced diagnostic methods. The laboratory is equipped with instruments such as DEXA (Dual-Energy X-ray Absorptiometry) for body composition and bone mineral density analysis, soft tissue ultrasound for the evaluation of muscular and tendon structures, as well as static ultrasound for structural and functional assessment.

The information obtained supports the diagnostic process and the development of targeted strategies aimed at optimizing health status and physical performance.

5. Sports Medicine Laboratory

The Sports Medicine Laboratory addresses the clinical and medical-sports aspects of physical activity. Activities include medical-functional evaluation of athletes, identification and monitoring of sports-related pathologies and injuries, as well as supervision of recovery processes and return to sport.

The laboratory contributes to the interdisciplinary education of students by integrating expertise in medicine, physiology, biomechanics, and training sciences.

6. Linguistics Laboratory

Integrated audio system, with speakers positioned to ensure adequate sound distribution throughout the room; Large television connected to the computer, enabling real-time transmission of all multimedia content used during lectures. The technological configuration of the classroom ensures the effective delivery of lectures, seminars, presentations, and multimedia teaching activities.

2. Classroom A.4

Classroom A.4 is one of the largest teaching spaces of the University, with a total capacity of 200 students. The room is intended for lectures, conferences, seminars, and other academic activities involving a high number of participants.

The classroom is equipped with:

- High-definition video projector with projection screen;
- Computer workstation for the lecturer, integrated with the audiovisual system;
- Professional audio system, suitable for ensuring clarity and uniform sound distribution even with a large number of students;
- Large television connected to the computer system for the simultaneous display of teaching content.

The technological equipment and seating capacity of Classroom A.4 ensure the regular and efficient conduct of academic and institutional activities, in compliance with the quality standards required for higher education.

Sports Games Hall

The **Sports Games Hall** at the Sports University of Tirana is a modern indoor facility designed to support both academic activities and competitive sports events.

The hall includes:

- **Two basketball courts**, built according to official dimensions and suitable for training sessions, university championships, and friendly or official matches.
- **Two volleyball courts**, fully equipped and adaptable for both teaching purposes and competitive games.

The facility provides a safe and professional environment for students, athletes, and staff. It is regularly used for practical classes, university tournaments, and inter-university competitions. The hall is equipped with standard sports flooring, lighting systems, spectator seating areas, and the necessary sports equipment to ensure high-quality training and performance conditions.

These facilities support both traditional and technology-enhanced teaching methods, ensuring effective delivery of lectures, seminars, and interactive educational activities.

A dedicated classroom (Classroom G1), located on Level 0 of Building G, with a seating capacity of 47 students, is specifically assigned to the Degree Course in Dietetics, ensuring adequate space for lectures, seminars, and interactive teaching activities.

COMPUTER SCIENCE LABORATORIES

The University of Magna Graecia of Catanzaro provides dedicated Computer Science Laboratories located on Level 0 of Building G within the Medical and Biosciences Area and within additional facilities in the Law and Economics Building of the university campus. These laboratories support teaching, research, and practical training activities for students enrolled in healthcare and biomedical degree programs, including the Degree Course in Dietetics.

The infrastructure includes two fully equipped computer laboratories, each with a capacity of 25 workstations, for a total of 50 computer stations. Each workstation is equipped with a personal computer connected to the university network and high-speed internet access, ensuring full access to digital learning resources, scientific databases, and academic software.

The laboratories provide secure access to institutional platforms, online teaching systems, and international scientific databases, supporting educational and research activities.

CLINICAL NUTRITION UNIT AND BODY COMPOSITION LABORATORY

The Clinical Nutrition Unit and Body Composition Laboratory at the University of Magna Graecia of Catanzaro is a specialized facility dedicated to the clinical assessment of nutritional status, metabolic health, and body composition through advanced diagnostic and imaging technologies. The Unit plays a central role in clinical care, scientific research, and the professional training of students enrolled in healthcare degree programs, including the Degree Course in Dietetics, ensuring the integration of theoretical knowledge with practical and clinical competencies.

The laboratory is equipped with state-of-the-art diagnostic instruments for comprehensive evaluation of body composition and metabolic function. These include Dual-Energy X-ray Absorptiometry (DXA) systems for precise assessment of bone mineral density and regional body composition, bioelectrical impedance analysis (BIA) devices for the evaluation of fat mass, lean mass, and body water compartments, air displacement

Research activities conducted within the laboratory include in vitro and experimental models of metabolic and chronic-degenerative diseases, including obesity, diabetes, hepatic steatosis, osteoporosis, and sarcopenia. The laboratory also focuses on the study of lipid metabolism and lipoprotein disorders, including familial hypercholesterolemia and related metabolic syndromes. Particular emphasis is placed on the development, characterization, and testing of nutraceutical compounds and functional foods derived from Mediterranean plant matrices, supporting sustainable and innovative approaches to disease prevention and personalized nutrition.

The laboratory supports both scientific research and educational activities, allowing students to acquire practical competencies in molecular nutrition, nutraceutical development, and translational research. These activities contribute to the integration of basic science, clinical nutrition, and applied research, in accordance with national and international standards for biomedical and healthcare education.

AFFILIATED TEACHING HOSPITALS AND CLINICAL TRAINING FACILITIES

The University of Catanzaro has formal agreement with tertiary healthcare institutions, (Azienda Ospedaliero Universitaria "Renato Dulbecco") and with the Local Health Authority (ASP) of Catanzaro to ensure high-quality clinical training and professional education for students enrolled in healthcare-related academic programs, including those participating in international degree programs in Dietetics.

"Renato Dulbecco" University Hospital of Catanzaro

The "Renato Dulbecco" University Hospital of Catanzaro is the main hospital hub of the Calabria Region and was established through the integration of the former hospital structures of the area, with the aim of combining healthcare, university teaching, and biomedical research within a single organizational system. The Hospital works in close cooperation with the "Magna Graecia" University of Catanzaro and serves as a regional referral center for several highly specialized care pathways.

The Hospital is organized into three hospital sites and provides a total of 855 beds. It hosts a Level II Emergency Department (DEA di II livello) and delivers emergency care, inpatient care, day hospital, day surgery, outpatient services, and advanced diagnostic and therapeutic procedures. It ensures high-level care in almost all major medical and surgical specialties, with particular strengths in oncology, cardiovascular diseases, infectious diseases, maternal and child care, and neonatal intensive care.

Its organizational model is based on departments and complex/simple operational units sharing staff, technologies, and professional expertise. The Hospital also includes highly specialized diagnostic and support services, such as laboratory medicine, pharmacy, pathology, radiology, neuroradiology, and medical physics, with activities distributed across the different hospital sites.

UNIVERSITY CANTEEN AND STUDENT SERVICES

The University of Magna Graecia of Catanzaro provides a modern university canteen located within the “Salvatore Venuta” Campus, on Level 1 of Clinical Building C. The facility extends over an area of approximately 1,500 square meters and has a seating capacity of approximately 250 persons, ensuring adequate accommodation for students, academic staff, and university personnel.

The canteen offers daily meal services, including lunch and dinner, providing nutritionally balanced menus designed to meet the needs of the academic community. The facility includes dedicated dining areas designed to ensure comfort, accessibility, and appropriate conditions for student well-being.

In addition to the central canteen, the campus is equipped with several complementary food service facilities, including three café and snack bar areas located in:

Clinical Building (Level 3);

Preclinical Building – Building G (Level -1), near the Student Administrative Offices;

Law and Economics Building (Level 0).

These facilities provide meals, snacks, beverages, and refreshments throughout the day, supporting students during academic activities.

Automatic vending machines offering hot and cold beverages and food products are also distributed throughout the campus buildings, ensuring continuous access to food services.

These services contribute to ensuring adequate student support, promoting well-being and facilitating full participation in academic activities.

UNIVERSITY STUDENT RESIDENCES

The University of Magna Graecia of Catanzaro, through the University Foundation, provides modern on-campus student residences located within the “Salvatore Venuta” University Campus, behind the Law and Economics Building. The residential facilities offer a total capacity of 240 beds and are designed to support students enrolled in healthcare degree programs, including the Degree Course in Dietetics.

The University Sports Center organizes sports activities, training programs, and university competitions, contributing to students' physical and psychological wellbeing and promoting a balanced academic environment. These facilities complement the educational infrastructure of the campus and support the development of healthy lifestyles, in accordance with national standards for university student services and wellbeing.

INCLUSION AND DISABILITY SUPPORT SERVICES

The University of Magna Graecia of Catanzaro provides dedicated services to support students with disabilities and specific learning needs, with the aim of ensuring equal access to education and full participation in academic life.

The university has implemented an integrated inclusion program designed to facilitate students' academic progress and social integration within the university community. This program includes specialized educational, technological, and psychological support services.

Available services include:

- Information and support desk, providing guidance and assistance to students with disabilities and their families, facilitating integration into university life and addressing academic and administrative needs;
- Specialized tutoring services, offering individualized academic support, monitoring students' educational progress, assisting with access to learning materials, and supporting administrative procedures;
- Assistive technological tools, provided in collaboration with the University Library System, including accessible digital materials, audiobooks, and assistive technologies that facilitate learning and study activities;
- Accessible educational resources, including transcription of learning materials into accessible formats such as Braille and digital audio formats;
- Psychological counseling services, aimed at promoting students' psychological wellbeing, supporting adaptation to university life, and addressing academic and personal challenges.

These services ensure an inclusive learning environment consistent with national legislation and European standards for accessibility and equal opportunity in higher education.

INTERDEPARTMENTAL CENTER FOR PSYCHOLOGICAL COUNSELING AND STUDENT SUPPORT

The nursery offers dedicated and fully equipped spaces for early childhood care, including rooms for educational and recreational activities, dining areas, rest areas, and an outdoor garden equipped for play and social interaction. The service is intended primarily for the children of university staff, healthcare personnel of the University Hospital "Renato Dulbecco" and affiliated institutions, with additional availability for the local community when places are open.

The facility accommodates children aged between 1 and 3 years and ensures a safe, inclusive, and professionally supervised environment. In addition to the standard nursery service, a flexible baby parking service is available in the afternoons and on Saturdays to meet the diverse needs of families.

The nursery service is certified according to ISO 9001:2015 international quality standards, ensuring high-quality administrative management and educational support.

This service contributes to the creation of a supportive and inclusive university environment, enhancing student wellbeing and facilitating equal access to higher education.

Annex 3

PARAMETERS FOR THE DETERMINATION OF THE SINGLE STUDENT CONTRIBUTION

For the purpose of determining the single contribution payable by students, the requirements specified below shall be taken into account, as well as the Equivalent Economic Situation Indicator (ISEE).

Students enrolling for the first time in the Italian university system

For students enrolling for the first time at the University, the contribution shall be calculated solely on the basis of the ISEE income.

For extra UE students the contribution shall be calculated solely on the basis of their assessed income, as certified (free of charge) by an authorized tax assistance center.

For students enrolled in years subsequent to the first, the income bracket shall be determined on the basis of the following requirements:

Income Bracket	From ISEE (€)	To ISEE (€)	REQUIREMENTS B and C	ONLY REQUIREMENT C	None of the above cases
7th	€ 55,000.01	—	€ 1,764.00	€ 2,436.00	€ 2,520.00

Percillen marrëveshjet e programeve të përbashkëta me Universitetin "Magna Graecia", Catanzaro në Itali.
